« Message from the Department »

Welcome to Dermatology! You can experience many skin diseases such as paraneoplastic cutaneous signs, skin manifestations of collagen-vascular disease, and several kinds of skin signs of internal medicine diseases in this department. You can also learn latest dermatological therapy including immune-biologics treatment for psoriasis. Additionally, we actively perform skin surgery and laser treatment, so you can experience various fields in dermatology. We convinced your internship at St Luke's hospital of dermatology will become a significant meaningful week. Many students visited in the past highly evaluate after finishing internship in dermatology, we recommend you to select dermatology practice if you are planning your internship at St Luke's hospital.
