« Message from the Department »

In hematology department, we provide comprehensive medical service and care for a variety of malignant and non-malignant hematological disorders. For malignant diseases, every kinds of state-of-the-art treatment are available in this hospital in cooperation with pediatric department, radiation oncology department, and other departments. We perform hematopoietic stem cell transplantation in regular basis, using bone marrow, peripheral blood stem cell, and cord blood. There are a lot of patients with non-malignant hematological disorders referred by other departments and family doctors.

Comprehensive teaching of clinical hematology, laboratory hematology and transfusion medicine is available.
