« Message from the Department »

The Department of Orthopaedic Surgery is dedicated to providing excellent patient care in the fields of orthopaedic surgery, offering a comprehensive approach for the diagnosis, treatment and rehabilitation of injuries and diseases related to the musculoskeletal system. The Department provides care in a variety of orthopaedic specialties; adult reconstructive surgery, sports medicine, spine surgery, shoulder and elbow surgery, hip and knee surgery, foot and ankle surgery, and trauma surgery.

Providing clinical services for patients seeking care for orthopaedic problems, our faculty and physicians maintain quality educational programs for residents and fellows. We perform approximately 1,000 surgeries each year at St. Luke's International Hospital. The attending physicians conduct a comprehensive education program in which conferences are held weekly. These include Journal club and research meeting at 7:30 am on Monday, preoperative conference at 5:00 pm on Tuesday, and sub-specialty conferences at 7:30 am on Friday.
